

CARBON STEEL TROWEL CARE

Marshalltown manufacture both Stainless and Carbon Steel trowels. If you decide the Carbon Steel Trowel is the correct float for your needs it is essential you take proper care of the tool to prevent rusting....

1. Always wipe down the blade when the trowel is finished with, taking care to remove any moisture.
2. Do not allow plaster to build up on the blade or around the tang.
3. Store the trowel in a dry place when not in use.
